

Rethinking Competency Management in Healthcare.

Xapimed puts clinicians at the center of their development journey and helps hospitals nurture their workforce and stay compliant.

Your Trusted Content

Use your organization's competencies, assessments, and skills checklists. Xapimed works the way your organization works.

Time-saving Automation

Automated workflows free up time for educators to focus on clinician competency development.

Visibility

See who's competent, who's not, and who needs help getting there.

Peace of Mind

A digital audit trail, reminders & notifications mean you are always in control and audit-ready.

Analytics

Inform decisions and lead organizational improvement with workforce and performance insights.

No more bottlenecks

Electronic workflows and notifications mean Preceptors, NPD practitioners, and managers can focus on caregivers, not paperwork and data entry.

On-the-job with Xapimed

From day-to-day competency management tasks to supporting new skill and development initiatives, Xapimed has you covered.

Projects you can start with Xapimed today.
